# Web Developer

## Overview
-

DX is looking for a full time mid-weight developer to join its technical team. The role would be ideal for a Computer Science graduate with some experience who happens to think that the web is a vast and wonderful playground for both established and new technology. You'll be exposed to challenges that typically involve translating creative visions into beautifully coded implementations that can handle high traffic volumes. You'll be working closely with Art Directors / Designers. We'd really like to find someone who isn't deterred by a challenge and can show evidence of their long-term interest in web technologies, for example through involvement in Open Source projects, collaborations with friends and so on. You get major bonus points for demonstrating your experience with and excitement for mobile development (especially using HTML5 incl. CSS3) and social networks as a platform.

## Required
-

• Solid experience in LAMP, relevant knowledge in web development & maintenance is prefered
• Knowledge of HTML, CSS + Javascript using jQuery or similar,  abilitiy to composite site using
  DIV, CSS & optimize site follow the SEO standard
• Knowledge of User Experience Design (usabilitiy, accessibility etc.) & web standard
• Strong understanding of cross-browser and platform coding requirements
• Certificate or equivalent in computer science, Engineering, (or a related field)

## Bonus
-

• Expertise in any one programming language
• Photoshop
• Hardware experience
